DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

Applicant's election with traverse of Group I, claims 1, 2, 4-12 and lipoic acid and N-phenyl-2-thiophenecarboximidamine in Paper No. 2 is acknowledged. The traversal is on the ground(s) that groups I and III are drawn to a special technical feature in the fact that they are pharmaceutical compositions having the dual activity of inhibiting NO synthase and antioxidant activity and group III is a method of using that composition. This is not found persuasive because as stated in the previous office action the different groups do not share a special technical feature since the composition is both anticipated and obvious over the cited references of record.

Claims 25-36 stand withdrawn from further consideration by the examiner as being drawn to non-elected subject matter.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

Claims 1, 4-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Naftchi et al. '933 or '962.

Applicant argues that the patents disclose a single compound with both ingredients whereas applicant allegedly claim a mixture of two separate ingredients. As is clearly shown at the cited portions of the patents, they teach both ingredients together (lipoic acid and aminoguanidine). The claims claim a composition consisting essentially of a NO synthase inhibitory substance and a metabolic antioxidant substance which the two references teach.

Claim Rejections - 35 USC § 103

Claims 1, 4-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Naftchi et al. '933, Naftchi et al. '962, Petrus or Lai.

The teachings and arguments of the Naftchi references are discussed above. Applicant argues that Petrus uses an aminosugar and therefore cannot teach the claimed invention because the claimed invention uses the language, "consisting essentially of". The composition can be administered in oral form, thus one could administer the composition in a glass of orange juice which would have vitamin C in it. Thus, Vitamin C in this instance is another ingredient which could read on "consisting essentially of".

In response to the language "consisting essentially of" in the claim, applicant is reminded of MPEP 2111.03:

For the purposes of searching for and applying prior art under 35 U.S.C. 102 and 103, absent a clear indication in the specification or claims of what the basic and novel characteristics actually are, "consisting essentially of" will be construed as equivalent to "comprising." See, e.g., PPG, 156 F.3d at 1355, 48 USPQ2d at 1355 ("PPG could have defined the scope of the phrase consisting essentially of" for purposes of its patent by making clear in its specification what it regarded as constituting a material change in the basic and novel characteristics of the invention."). See also *In re Janakirama-Rao*, 317 F.2d 951, 954, 137 USPQ 893, 895-96 (CCPA 1963). If an applicant contends that additional steps or materials in the prior art are excluded by the recitation of "consisting essentially of," applicant has the burden of showing that the introduction of additional steps or components would materially change the characteristics of applicant's invention. *In re De Lajarte*, 337 F.2d 870, 143 USPQ 256 (CCPA 1964). See also *Ex parte Hoffman*, 12 USPQ2d 1061, 1063-64 (Bd. Pat. App. & Inter. 1989) ("Although consisting essentially of is typically used and defined in the context of compositions of matter, we find nothing intrinsically wrong with the use of such language as a modifier of method steps. . . [rendering] the claim open only for the inclusion of steps which do not materially affect the basic and novel characteristics of the claimed method. To determine the steps included versus excluded the claim must be read in light of the specification. . . . [I]t is an applicant's burden to establish that a step practiced in a prior art method is excluded from his claims by consisting essentially of language.").

Thus, the claimed invention is still obvious over the cited references.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
